### **ENABLING ACTIVITIES FOR THE PREPARATION OF MACEDONIA'S SECOND NATIONAL COMMUNICATION TO THE UNFCCC**

#### Brief description

The project will enable Macedonia to prepare its Second National Communication to the Conference of the Parties of the UN Framework Convention on Climate Change. The activities within the Second National Communication are continuation and upgrade of the work done under the First National Communication (2000-2003) and the Enabling Activities phase II (2003-2004). The main components of the project are: a) Inventory of GHG Emissions b) assessment of potential impacts of climate change on the most vulnerable sectors, c) analysis of potential measures to abate increase of GHG emissions, d) National Action Plan to address climate change and its adverse impacts. The Project will further enhance the national capacities and will raise general knowledge on the climate change. It will also contribute to putting climate change issues higher on the national agenda through strengthened cooperation and increased involvement of all relevant stakeholders in the process. In addition, it will build up national capacities for participation in different mechanisms related to GHG mitigation and to fulfilling other commitments to the UNFCCC.
